Ivane Javakhishvili Tbilisi State University Faculty Exact and Natural Sciences Department of Computer Sciences

Bachelor Program

Computer Science კომპიუტერული მეცნიერება

Academic degree:
Bachelor of Computer Science

კომპიუტერული მეცნიერების ბაკალავრი

Tbilisi 2023

Faculty	Faculty Exact and Natural Sciences
Program name	Computer Science
Program volume in credits	240 ECTS
Language of teaching	English
Academic degree awarded	Bachelor of Computer Science
Prerequisite to access to the program	The Georgian citizens must pass Unified National Exams. Admission for the program requires minimal competence levels in following Unified National Exams: • English Language - 69% + 1 • Mandatory subjects— minimum competence levels is determined by National Assessment and Examinations Center Mathematics/Physics - minimum competence levels is determined by TSU faculty Exact and Natural Sciences Foreign applicants should follow the rules and terms defined by the Ministry of Education and Science of Georgia (http://www.mes.gov.ge/content.php?id=1131⟨=geo) according to the order №224/N of the Minister of Education and Science of Georgia (December 29, 2011). The Applicant should prove English language qualification equivalent to CEFR level B2 (or higher) or have a high school education in English.
Program Heads	Manana Khachidze
Program Coordinator	Magda Tsintsadze
Tution fee	for the citizens of Georgia - 2250 GEL For foreign nationals - \$ 4000 or equal in GEL per academic year

Program Educational Objectives

The educational objectives of the undergraduate program "Computer Science" are to issue graduates who will

- 1. be productive, responsible computing science professionals conducting research and/or design developing and maintaining projects in the various areas of Computer Science,
- 2. understand and apply ethical issues and social aspects of computing science in performing their duties as computer science professionals,
- 3. continue the learning of new technologies in the computer science area through self-directed professional development or post-graduate education.

Student Outcomes

Department of Computer Sciences adopted ABET CAC Student outcomes:

- 1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- 2. Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- 3. Communicate effectively in a variety of professional contexts.
- 4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- 5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- 6. Apply computer science theory and software development fundamentals to produce computingbased solutions.

ABET	CAC Student outcomes	Knowledge and understanding	Skills	Autonomy and Responsibility
1.	Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.			
2.	Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.			
3.	Communicate effectively in a variety of professional contexts.			
4.	Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.			
5.	Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.			
6.	Apply computer science theory and software development fundamentals to produce computing-based solutions			

Performance Indicators for Student Outcomes

Student Outcomes:

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.

PI 1: Analyze a complex computing problem to identify a solution

PI 2: Apply principles of computing to identify a solution to a complex computing problem

PI 3: Apply principles of relevant disciplines to identify a solution to a complex computing problem

2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.

PII1: Design a software solution to meet a given set of computing requirements

PII2: Implement a software solution to meet a given set of computing requirements

PII3: Evaluate a computing-based solution to meet a given set of computing requirements

3. Communicate effectively in a variety of professional contexts

PIII1: Participate effectively in group discussions

PIII2: Prepare an effective presentation

PIII3: Write an effective project report

4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.

PIV1: Recognize professional responsibilities in computing practice based on legal and ethical principles.

PIV2: Make informed judgment in computing practice based on legal and ethical principles

5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

PV1: Effectively engaged in team as member or leader

PV2: Contributes effectively for common task

6. Apply computer science theory and software development fundamentals to produce computing-based solutions.

PVI1: Apply computer Science theory to produce a solution

PVI2: Apply software development fundamentals to produce a solution

Level Of Learning Achievement

The learning outcomes are defined in the disciplines envisaged by the Bachelor Program of "Computer Science", which are taught in I-VIII semester. To reach this level means:

- Knowledge of fundamental principles and theories in computer science;
- Ability to use key and fundamental algorithms of computer science in different fields of science and practice;
- Ability to use modern programming languages and tools;
- Ability to operate and use different purpose tools of computer science and information technology.

Fields of Employment

Fields of employment of Bachelor of Computer Science are: Governance bodies, educational institutions and organizations of different forms of ownership which use computer technologies for their activities. Bachelor of computer science is predominantly prepared for the development and use of modern methods in the field of economy, management and financial activities. Bachelor of Computer Science can occupy any position that according to the laws of Georgia require higher education. The presented bachelor program takes care of graduates' employment, by means of providing opportunities for continues education, as well as by means of invited lectures participating in the program: most of them are representatives of big employers at Georgian labor market, their tight relationship with students increases the chance of employment of successful students with favorable conditions.

The Possibility to Continue Learning

Bachelor of Computer Science will be able to continue their study at master degree programs in Computing area, which represent the extension of the undergraduate program. The graduates can continue their education also at master programs in mathematics, engineering, and other Natural Sciences those prerequisite are programming and mathematical knowledge. Major specialty-choosing deadline

The third semester is the deadline for choosing major specialty (optimal is the second semester). If students change their mind, they will be able to continue learning at other bachelor programs being carried out at the faculty (mathematics, electronics).

Program Delivery Modes

The Computer Science program is offered as an on-campus daytime program. Our academic year is divided into two semesters (fall and spring). Each semester 15 weeks of instruction, with the sixteenth week used for final examinations.

The required courses in computer science are offered in every semester, and the most of elective ones are offered at least once a year. Most undergraduate courses are offered during daytime.

There are three basic program delivery modes:

Lectures: verbal, problem-based learning (PBL), demonstration method, induction, deduction, analysis and synthesis.

Seminars, practical and laboratory teaching: verbal, book-based method, laboratory and demonstration methods, practical methods, induction methods, analysis method, and synthesis method, electronic attending (E-learning).

Team Projects: Verbal, PBL, E-learning, cooperative learning, collaborative work.

Grading scheme and grade distribution guidance

The student's knowledge is being evaluated according to the following system: "Excellent", "Very good", "Good", "Satisfactory", "Sufficient", "Marginal fail" and "Fail"

A student is evaluated in accordance with the following principle:

Scores	Evaluation	Classification of	GPA of
		Evaluation	Evaluation
91 and more	(A) "Excellent"	Positive	4.0
81 -90	(B) "Very good"	Positive	3.0
71 -80	(C) "Good"	Positive	2.0
61 -70	(D) "Satisfactory"	Positive	1.0
51 -60	(E) "Sufficient"	Positive	0.5
41 -50	(FX) "Marginal Fail"	Negative	0
40 and below	(F) "Fail"	Negative	0

The student's final mark in a specific subject is determined by the number of point collected by him/her in the different components (lecture, seminar, practical studies, laboratory exercises) in the course of interim and final (examination) evaluation.

The maximum a viable point in each course is 100. Final exam does not exceed 40 points, interim evaluation represents a combination of test scores, presentation in the class, and team or individual projects. The weight of each components are different for different course and are defined in syllabuses

Grading System of the CS Program is consistent with the TSU standard grading system:

Evaluation	Scores	GPA
A	91-100	4.0
В	81-90	3.0
С	71-80	2.0
D	61-70	1.0
Е	51-60	0.5
F-FX	0-50	0.0

Curriculum

Full volume of 240 ECTS. from here:

140 ECTS - Computer Science subjects;

30 ECTS - Mathematical subjects;

20 ECTS - Natural Sciences subjects;

30 ECTS - General education

20 ECTS – Free.
